

1. Decision Tree:

Confusion Matrix:

[72, 7]

[8, 33]

Purchased

0 257

1 143

Overall Data: 400

30% test means: 120

What is overall performs in decision tree classification? 0.88

What is Recall of Zero or what is recall for not purchased or what is correct perform of not purchase? 0.91

What is Recall of One or what is recall for purchased or what is correct perform of purchase? 0.80

What is Precision of Zero or What is Precision for not purchased or What is prediction right and wrong classified as not purchased? 0.90

What is Precision of One or What is Precision for purchased or What is prediction right and wrong classified as purchased? 0.82

What is F1-score of Zero or what is Not purchased F1 -score? 0.91

What is F1-score of One or what is purchased F1 -score? 0.81

What is Zero count in Test Data or What is correct test data count for not purchased?

79

What is One count in Test Data or What is correct test data count for purchased?

41

What is precision of macro-Average? 0.86

What is recall of macro-Average? 0.86

What is f1-score of macro-Average? 0.86

What is precision of Weighted-Average? 0.87

What is recall of Weighted -Average? 0.88

What is f1-score of Weighted -Average? 0.87

What is Total test data for both purchased and not purchased? 120

2. Random Forest:

Confusion Matrix:

[72, 7]

[3, 38]

Purchased

0 257

1 143

Overall Data: 400

30% test means: 120

What is overall performs in decision tree classification? 0.92

What is Recall of Zero or what is recall for not purchased or what is correct perform of not purchase? 0.91

What is Recall of One or what is recall for purchased or what is correct perform of purchase? 0.93

What is Precision of Zero or What is Precision for not purchased or What is prediction right and wrong classified as not purchased? 0.96

What is Precision of One or What is Precision for purchased or What is prediction right and wrong classified as purchased? 0.84

What is F1-score of Zero or what is Not purchased F1 -score? 0.94

What is F1-score of One or what is purchased F1 -score? 0.88

What is Zero count in Test Data or What is correct test data count for not purchased?

79

What is One count in Test Data or What is correct test data count for purchased?

41

What is precision of macro-Average? 0.90

What is recall of macro-Average? 0.92

What is f1-score of macro-Average? 0.91

What is precision of Weighted-Average? 0.92

What is recall of Weighted -Average? 0.92

What is f1-score of Weighted -Average? 0.92

What is Total test data for both purchased and not purchased? 120

3. SVM:

Confusion Matrix:

[79, 0]

[41, 0]

Purchased

0 257

1 143

Overall Data: 400

30% test means: 120

What is overall performs in decision tree classification? 0.66

What is Recall of Zero or what is recall for not purchased or what is correct perform of not purchase? 1.00

What is Recall of One or what is recall for purchased or what is correct perform of purchase? 0.00

What is Precision of Zero or What is Precision for not purchased or What is prediction right and wrong classified as not purchased? 0.66

What is Precision of One or What is Precision for purchased or What is prediction right and wrong classified as purchased? 0.00

What is F1-score of Zero or what is Not purchased F1 -score? 0.79

What is F1-score of One or what is purchased F1 -score? 0.00

What is Zero count in Test Data or What is correct test data count for not purchased?
79

What is One count in Test Data or What is correct test data count for purchased?
41

What is precision of macro-Average? 0.33

What is recall of macro-Average? 0.50

What is f1-score of macro-Average? 0.40

What is precision of Weighted-Average? 0.43

What is recall of Weighted -Average? 0.66

What is f1-score of Weighted -Average? 0.52

What is Total test data for both purchased and not purchased? 120
